

## Company History and Experience

MCS Woodworking has been in business since August of 1995. We specialize in commercial plastic laminate millwork. MCS produces custom cabinets, displays, moldings and many other made to order items to meet the requirements of new and existing construction. We produce shop drawings made on the latest C.A.D. system, and will provide cost engineering to produce the most cost effective finished product.

The experience I have as a journeyman cabinetmaker and the various skills I have obtained since entering this trade in 1976, give me the advantage of supplying you with a quality product in a timely manner. We have previously worked with contractors such as Opus North Corp, Fulcrum Const, Itasca Const, Dahlman Const, and Creative Business Interiors, to name a few.

We look forward to doing business with you and your company. Please call us when we can assist you regarding any of your woodworking needs.

Sincerely,

Michael Schmidt

President
